

BETTER GOLF

By Greg Petzer / City Golf Head Teaching Professional

Putting is one of the most crucial and important parts of the game – normally a third of any persons strokes per round in fact! So, in this golf tip I stress the importance of a good setup when putting. It is important to get your eyes over the ball in the setup and if you take a look at the photo you will notice a very easy way to perfect this. Simply take your stance and when ready drop a ball from your eye – if the ball lands on the ball below, you are in a good setup position. Having a good setup like this will make it easier to see the line of the putt as well as improve your aiming and putting stroke. The end result will be fewer putts per round.

Can golf really be cool?

Well we think so. City Golf is a great way for students to test out the game without all that hassle of buying expensive golf gear, wearing grandad's clothes and sweating your way around a course for 5 hours. City Golf have made it a lot easier than that with amazingly accurate golf simulators that allow you to play the world's best courses in air-conditioned comfort. Imagine Tiger Woods Golf on the PS3 apart from you're actually playing yourself, with real clubs and balls. There's even a reasonably priced bar & restaurant, pool tables, loads of TV screens showing the latest sport and free wifi. Golf has never been so cool.

Students' offer

City Golf have given you even more reason to pick up the clubs with their generous offer of half price golf for students during the week before 6pm. So for 25 RM per hour, you and 8 friends can golf in style. That's only 3 RM per person so just flash your student card and get golfing.
